ALTO

What does continuity mean for your business?

It's no longer a matter of "if," but "when" a real world threat may compromise your business data. Between viruses, user error, and ransomware like "cryptolocker," these threats are becoming ever-present. Imagine your server fails. Imagine you or an employee accidentally deletes important files or a virus corrupts your systems. Imagine all your customer data disappearing.

Now imagine getting it all back in a matter of minutes. Your business is up and running, and you're back to making business decisions.

Business continuity made for small businesses

As a small business owner, you're always on. Your customers rely on you, as much as you rely on them. There's no such thing as downtime, and you can't afford to leave things to chance.

ALTO gives you peace of mind knowing that no matter what happens, your business is protected from data disasters. This powerful business continuity solution brings together a compact, reliable device and a secure cloud storage environment. The result is an affordable backup, recovery, and business continuity solution.

> **IT'S NO LONGER A MATTER OF "IF," BUT "WHEN" A REAL WORLD THREAT MAY COMPROMISE YOUR BUSINESS DATA.**

ALTO

End-to-end
business continuity
for IT environments

Local and cloud
backup storage

Cloud based full
system recovery

Mitigate compliance and
regulatory concerns

Managed entirely by
your service provider

ALTO provides Total Data Protection built for SMBs

ALTO combines key elements of data protection into a single fully integrated package built for the SMB environment: backup capture, backup restore, and a complete virtual host for business continuity.

- **Leverage award winning core technologies**
  Easily protect your IT infrastructure without the need for multiple tools. Backup your data, including your operating systems and applications from Windows or Linux, and files and folders from your Mac automatically to a local device with copies in our secure cloud storage environment.

- **Recover critical data quickly**
  Should you experience a server failure, the ALTO can have your Windows or Linux environment and data recreated in minutes from the Datto Cloud, and have your Mac files and folders recovered just as quickly.

- **Proof that your backup was successful**
  Visual proof in the form of a screenshot and service verification gives you peace of mind that your data has been successfully backed up.

- **Big time security, small footprint**
  ALTO packs a powerful punch in a small footprint that can fit in almost any office space or desk.

What do you get with Datto?

- **Data Protection on Premises and in the Datto Cloud**
  Every image-based snapshot of your system is stored both locally and in secure, purpose-built data centers using Datto technology. This means no third-party cloud providers are involved in the safety of your data.

- **Built for Quality**
  All Datto business continuity products are designed and assembled in Datto's build facilities in Monroe, CT by a highly trained team using the best components on the market. Each device is assembled to exacting standards with extreme attention to detail.

- **An Award-Winning Industry Leader**
  Award-winning technology and innovative new solutions from a team that prides itself on building a better business continuity solution day in and day out. Datto has been recognized for its ingenuity by The Atlantic, Forbes, Fast Company, Bloomberg Business, and The New York Times.
