

SIRIS

What Does Continuity Mean For Your Business?

Imagine you are a medical practice that can't book appointments because your server is down. How long could this business be down before it starts to "hurt" patients? Imagine you are a law firm that needs specific case files, but whose files were recently "locked up" by the Cryptolocker virus. Imagine you are a retail business that needs to process hundreds of transactions a day, but your point of sale system was damaged in an electrical storm, and you can't process and record transactions. How will you stay in business? What will you do?

Now imagine getting it all back in a matter of seconds. Your business is running, and you're back to making business decisions.

It's no longer a matter of "if," but "when" a real world threat will compromise your business data. Between natural disasters, viruses, user error, and ransomware like "cryptolocker," these threats are becoming ever-present.

Business Continuity Made For Your Business

No matter how complex your IT environment may be, business continuity should be simple, fast, and fail-safe. It should work when you need it to – in an instant's notice – locally in your office or from an off-site location. It should prove itself day in and day out on your schedule.

Datto SIRIS is a robust business continuity solution that brings together state of the art hardware with a secure cloud storage capability.

The result is a comprehensive backup, recovery, and business continuity solution that gets your business up and running instantly in the event you can't access your data or systems.

IT'S NO LONGER A MATTER OF "IF," BUT "WHEN" A REAL WORLD THREAT WILL COMPROMISE YOUR BUSINESS DATA. WILL YOU BE READY?

End-to-end business continuity for IT environments

Backup your data as frequently as every 5 minutes

Restore entire servers in minutes, not hours or days

Both local and cloud options for data recovery

Mitigate compliance and regulatory concerns

Managed entirely by your service provider

With a SIRIS You Get Total Data Protection

SIRIS combines the most important elements of data protection into a single fully integrated package: backup capture and verification, backup restore, and a complete virtual host for business continuity.

- **Leverage award winning core technologies**

Easily protect your IT infrastructure without the need for multiple tools. Backup your data, including your operating systems and applications from Windows or Linux, and files and folders from your Mac automatically to a local device with copies in our secure cloud storage environment.

- **Recover critical data quickly**

Should you experience a server failure, the SIRIS can have your Windows or Linux environment and data recreated in minutes from the local device or the Datto Cloud, and have your Mac files and folders recovered just as quickly.

- **Proof that your backup was successful**

Visual proof in the form of a screenshot and service verification gives you peace of mind that your data has been successfully backed up.

- **Compare backup points**

Now you never need to guess when data was deleted, added, or modified. You can know what changed and when – in a matter of minutes.

What Do You Get With Datto?

- **Data Protection on Premises and in the Datto Cloud**

Every image-based snapshot of your system is stored both locally and in secure, purpose-built data centers using Datto technology. This means no third-party cloud providers are involved in the safety of your data.

- **Built for Quality**

All Datto business continuity products are designed and assembled in Datto's build facilities in Monroe, CT by a highly trained team using the best components on the market. Each device is assembled to our exacting standards with extreme attention to detail.

- **An Award-Winning Industry Leader**

Award-winning technology and innovative new solutions from a team that prides itself on building a better business continuity solution day in and day out. Datto has been recognized for its ingenuity by The Atlantic, Forbes, Fast Company, Bloomberg Business, and The New York Times.
